SUBJECT INDEX TO VOLUME 33

The Index comprises a consolidated list of references, compiled from the sectional contents lists of the individual issues.

Within the Sections normally used (**NICKEL, ELECTRODEPOSITION,** etc.), the items are classified in appropriate sub-sections, within which they are, in most cases, entered in alphabetical order.

A list of **Trade-Named Materials** and **Processes** referred to in this volume appears on pages 346-347.
